Application/Control Number: 10/619,211

Art Unit: 3723

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-8, 10-16, 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Davies.

In Davies 20,21 is a flexible shaft, 30,35 is a valve core engaging member having an unthreaded forked front end and a threaded rear portion, 24,20 is a swivel fitting, the sleeve on the opposite end of the flexible shaft may be termed a handle since it is intended to be grasped by a user. Statements of intended use such as what a recess is intended to engage have not been accorded any patentable weight.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davies in view of Lea.

The Davies flexible shaft is made from swivel balls and rods.

Lea teaches that a flexible shaft may be made from cable.

To make the Davies flexible shaft from cable would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Lea.

Art Unit: 3723

One of ordinary skill in the art would have been motivated to do this in order to provide a more strong flexible cable that can be manufactured more cheaply.

Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert C. Watson whose telephone number is 703 308-1747. The examiner can normally be reached on Mon. - Thurs., 5:30am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail III can be reached on 703 308-2687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
